Hurry!! Expedite the project!!

Keep the Carp, One or more species of them, out of the Great Lakes and therfor out of the tributaries that they will get into, if they get into the Great Lakes. Here in Manitowoc County we have many small Lakes. They will all be degraded if the carp get into Lake Michigan, because they all drain into Lake Michigan. (They are on Rivers or streams that drain into Lake Michigan)

This permanent barrier will Keep other new oxotics from traveling ~~up~~ or into or out of the Great Lakes. Thanks
