To whom it may concern:

I fully support your efforts in stopping the Asian carp from going into the Great Lakes. These fish would be very harmful to the wild life in the lakes. However, I do not believe you should tax people for it. Try to fundraise your money. This would avoid having to deal with protesters who might not want to contribute to this cause.

There are many stipulations on if you are closing the canal. I believe that there is an alternative. Use an electro

magnetic fence that is harmless to humans. That would keep out the carp while keeping humans safe.

Thank you for listening to my comments. I hope that you will consider them.

Sincerely,

David B.
