I have been to 4 asian carp fad.gov. circus tents & hope this gets through this time! It's called a kill zone& do a better job 1st # 1is that you need a containment area sterile of asian carp & only for native species to live in this requires the circus tent to act on a better view & create a second barrier & a kill zone to save the river & Great lakes up stream! & to build weir to catch more invasive species! Simple logic is what is needed! and to protect the 1st barrier from a train wreck & the ethanol express freight trains that exploded this summer to the west & east! A kill zone is the best way to control this crazed fish of eco doom if you put a little stop gap & clean out that section & monitor that river better it is no different than what the asians are doing to the oceans! CALLED OVER FISHING! THIS RIVER IS BUT A THREAD & ARE YOU GOING TO DO ANYTHING ABOUT THE UPPER MISSISSIPPI? Same kill zone applies up there! The 1st barrier is in such a hazard area Tornados, Trains, Generates out in the open! Redundant is the key & you have not planed for any sort of hazard to hit! When will we learn a simple word called SAFETY1ST! & That goes for our lakes 2 less oxygen more SOOT & GLOBAL WARMING TOXIC SEWER WATER FROM CHICAGO! NUFF SAID! DO A BETTER JOB! SIMPLE! KILL ZONE!
