My Husband and I have two beautiful daughters. We have brought them up loving the outdoors, swimming, camping, kayaking, etc. We live in Wisconsin and one of the wonderful things about this state is the Great Lakes. We want them to be wonderful treasurers for our daughters and future generations. Out of the 27 controls being studied by the Corps, only hydrological separation would result in a permanent solution to stop the Asian carp and other invasive species in the Great Lakes.

Please, our best chance to protect the Great Lakes is to focus in on what Congress authorized -prevention.

Therefore, we urge the Corps to use further study funds and efforts on moving forward on how to implement hydrological separation. Please act soon, before it is too late.

Thank you,

Dawn, John, Erin and Jessica Casper
