The only permanent solution to STOP the Asian carp and protect the Great Lakes from other aquatic nuisance species is hydrological separation.

As a civil engineer, I further understand the hydrologic necessity of restoring the natural divide between the Great Lakes and Mississippi River systems. Well intended for commerce centuries ago, the time has come for the USACE to restore it's credibility and do the right thing.

As a fisherman, outdoorsman, environmentalist and resident of a Great Lakes state, I urge you: PLEASE PURSUE HYDROLOGIC SEPARATION between Lake Michigan and the Mississippi River!
