Out of the 27 controls being studied by the Corps, only hydrological separation will result in a permanent solution to stop the Asian carp and other invasive species. Our best chance to protect the Great Lakes is to focus in on elimination of the risk. We urge the Corps to use further study funds and efforts on moving forward how to implement hydrological separation. Please do not take sacrifice our childrens future and our legacy, make the right choice and permanently eliminate the risk of a devastating disaster if bold action is not take, please implement hydrological separation
