Comment Submitted:

As a resident of Michigan I have seen the destruction caused by invasive species. Out of the 27 controls being studied by the Corps, only hydrological separation would result in a permanent solution to stop the Asian carp and other invasive species; Our best chance to protect the Great Lakes is to focus in on what Congress authorized -prevention; and We urge the Corps to use further study funds and efforts on moving forward how to implement hydrological separation.

Sincerely,

Don Munski
