I am writing today to urge the Army Corps of Engineers to focus their study efforts on the only option identified in the "Aquatic Nuisance Species (ANS) Control Paper" that would prevent the transfer of Asian carp and other aquatic nuisance species between the Great Lakes and Mississippi River basins. Out of the 27 controls being studied by the Corps, only hydrological separation would accomplish this and therefore is the only option authorized for study by Congress. I urge you to use further GLMRIS study funds and efforts on moving forward how to implement hydrological separation.
