AQUATIC NUISANCE SPECIES

ECOSYSTEMS

NAVIGATION

RECREATION

FLOOD RISK MANAGEMENT

WATER USE

## Nonstructural Alternatives

The Nonstructural Alternative includes ANS Controls that do not require implementation of structural features and may be implemented relatively quickly.

Examples of nonstructural ANS Controls include monitoring, removal (e.g., netting, manual harvest), chemical control (e.g., use of herbicides), controlled waterway use (e.g., inspection and cleaning of watercraft before or after entry to a water body), and educational programs.

This alternative is a shared responsibility between federal agencies, state agencies, local municipalities, nongovernmental organizations and the public.

ESTIMATED TIME UNTIL ALTERNATIVE IS COMPLETED: 0 YEARS
