Prevent Asian carp from devastating the Great Lakes/St. Lawrence River....no reducing the risk....stop this from happening. Think just of the economic impact,IF NOTHING ELSE,that Asian Carp in this area would have....our economy is fragile enough in the entire area we're talking about, without the Carp changing tourism, ecology, fishing, fishing guides,all types of recreation including tour boats, (think of the liability of fish jumping into a crowd of people on a boat and causing serious injuries); the list is huge. The Corps study takes too long! period, end of story!!! The Chicago portion of the study is not predicted to be complete until mid-2015, or nearly FIVE years from now. The Corps MUST acknowledge the URGENCY of finding a permanent solution, condense the timeline and produce final results for the Chicago portion of GLMRIS within 18 months rather than mid-2015!!
