I have been on the St. Lawrence River my entire life and have seen many changes in the waterway...some good, some bad. I have watched and read many articles about the Asian Carp and the devastation that they have caused in the waterways that they have invaded. I feel that it is imperative that these species be kept from the St. Lawrence as they would not only destroy the fishery, but people's lives, especially those that depend on the waterway for their livelihood. Thank you in advance for any and all effort put forth in the remediation of this species.
