I appreciate the efforts of the Corps of Engineers and others to study the spread of invasive species from the Mississippi into the Great Lakes. Unfortunately the results of the study will not be available until 2015 followed by at least a couple of years trying to get recommendations funded in the federal budget. The Asian Carp and other invasive species are on a more accelerated time line. I urge that permanent separation of the Mississippi and Great Lakes be created immediately. We can no longer afford to continue to create unnatural bridges between ecosystems and not reap dire consequences.
