Comment Submitted:

The Flint River Watershed Coalition fully supports the comments submitted by Freshwater Future, regarding the control of Asian Carp in the Great Lakes. Namely:

Out of the 27 controls being studied by the Corps, only hydrological separation would result in a permanent solution to stop the Asian carp and other invasive species.

Our best chance to protect the Great Lakes is to focus in on what Congress authorized -prevention.

We urge the Corps to use further study funds and efforts on moving forward how to implement hydrological separation.
