Creating a solution to stop the DESOLATION OF OUR GREAT LAKES by the invasion of Asian Carp is IMPERITIVE!!! No short cuts should be considered !!! Identifying prevention opportunities should be completed for all 18 pathways, not just a handful. Being prepared to stop 100% of the spread of Asian carp is your minimum target, not just a lofty goal. Eradicating this forein speces should be looked at also, these fish are dangerous to human boaters, as well as the native fish in the rivers where they are now found.
