At least one Asian carp has already found its way past the electric

barrier:<http://www.cbc.ca/canada/windsor/story/2010/06/24/wdr-great-lakes-asian-carp-100624.html>

Is the plan to "study" until it's entirely too late?

To waste precious time with further studies to "reduce the risk" rather than eliminate it, is criminal. The long term cost to the entire Great Lakes watershed as well as two nations, is far greater than the inconvenience of implementing an effective solution or if necessary, permanently closing Chicago's ship canal, a man made water diversion project created a century ago which would never be approved today.
