I cannot believe that the powers that be in my government are using that tired, cliché approach to duck your responsibility in the matter of the Asian Carp and it's "sister" the Silver Carp. You don't want to deal with a difficult matter; a budget nightmare if funds are not easy to come by, so you walk the old trail of "Don't offend"...don't tell them you have no intention of dealing with the problem you are faced with but will need their vote in the future so you use the old standby of the Do-Nothing Committee's..."We'll do a really nice lengthy study of this problem"...and then stonewall them to death. You are throwing away our last major CLEAN freshwater source in the continental United States and any industry based on that very clean condition. We have had to fight over many, many years to keep these waters clear of killing pollution in all its ugly forms. Now you folks are singlehandedly destroying these lakes and river by shortsighted, penurious, uncaring of the disaster you are creating by dragging your feet on the matter of STOPPING THE ASIAN CARP, not studying it to death. Have you no pride in these magnificent waters? Have you no concern for what will happen to the millions who depend upon these waters for livelihood, vacation destinations, the location of their homes and their futures. The struggle that will come from letting the system die of your neglect and the residents, nay...voters that you are abandoning. The plan in force will bring disaster...the clean up/reclamation that will follow will cost you more than you can imagine. History has proven it...this time let man do the right thing BEFORE it's too late.
