Hello Everyone! The Great Lakes water system is vital to many people as we all are aware - note that Lake Erie has seen, according to Ohio EPA reports, a great recovery over the past 20-plus years in both water quality and fish life spans. Please do all appropriate and moral means to keep the Asian carp out of the Great Lakes - how can we divert the Asian carp back to its natural waters? Thanks for taking my comments and for working diligently on this concern.
