Hydrologic separation of the Mississippi river basin and the Great Lakes is the ONLY way to prevent the destruction of the greatest and largest fresh water fishery in the world. 4 years of continued study and electric barriers (that have already failed) are not sufficient. We must act now or else be remembered as the generation who's inaction damned the Great Lakes's future. If allowed to enter the Great Lakes, the Asian carp WILL destroy the ecosystem....there is no doubt. Please consider the gravity of the situation and act immediately and accordingly. Thank you for your time.
