Regarding the spread of Carp into the Great Lakes, the Federal Gov't. and the U.S.Army Corp. of Engineers must take the most aggressive measures first and then study any deleterious effects, not the other way around. Damns must be constructed to prevent further spread of Carp into the Great Lakes and tributaries, right NOW. Although Illinois shipping must be sacrificed in part, other forms of the Illinois ground shipping economy will pick up the slack, albeit at a cost. The quantifiable risk of harm to the larger Great Lakes ecosystem and community is greater than the need of a relatively small segment of the Illinois citizenry.
