Get with the program. Quit wasting hundreds of thousands of dollars of taxpayers money on useless study fees to get rid of the asian carp. They are still there. Do a \$250,000.00 removal program. Put a \$.50 cent bounty on each carp turned in. Let the private sector collect and make fertilizer or pet food out of them. Thats 500,000 fish out of the system almost immediately. If that isn't enough double it again using money from the US Stimulus money, that most cities are pissing away on stupid purchases. Michigan alone stands to loose millions of dollars when that fish enters the great lakes region and takes over. That will happen if we waste anymore time. There are alot of people rite now unemployed who could use the extra cash to feed their family along the mississippi river and its tributaries. LETS SEE SOME ACTIONS THAT WILL REMOVE THE FISH PERMANENTLY INSTEAD OF DISCUSSING THE ISSUES!!!
