In all seriousness, the Federal Government is really doing nothing except holding a bill on a desk somewhere that could save a way of life for 100's of people. If the fish go, then the fisherman GO with their millions in cash infused into sm...all towns all along the coast, the restaurants, hotels, motels, fast food, bait shops (mom & pop shop is likely ) charter boats, the sport fisherman and the recreational.

Real estate along the Great Lake coast and near also, has been bought by citizens to retire or use as a cabin for the last 40-50 years due to the fishing in the great lakes. People retire and move here to fish and live somewhere beautiful. The fish of the Great Lakes are part of that beauty of nature that we as citizens need to preserve, not for our children or ourselves but because its the right thing to do. We should fight every invasive species at the start and with vigor.

I would like to plead with anyone who reads this to comment and support Eric. He has been an advocate for nature and our state for a long time and practices what he ask others do. Please support this cause, don't let our Great Lakes be full of carp and other fish wiped out in just years. WAKE UP AMERICA, WE NEED YOU
