Hello,

The Great Lakes need to be protected from forien threats of any pollution. This may come from a live form, a chemical form, a solid form.

These fish comming from the rivers must be stopped. One can see the results of their dammage just by looking at their streak as they came up the river. It takes no trained person to see the dammage they cause.

This is a political call and we the people will pay by loosing a great resorse while a few will line their pockets with money. THE GREAT LAKES ARE NOT FOR SALE. This should be our reason to stop the carp.

Thank You,

Daniel J Meneghin

Easc President
