What are we doing to stop the asian carp from infesting the great lakes? More research? Really? We need to stop them from migrating into other areas as soon as possible. Let us be proactive for once. In Lake Erie we already have many exotic species that are slowly destroying our fishery. I would like one day to take my kids out fishing but in another 10yrs with our government's mindset there will be no fish left--just carp, gobbies, and zebra mussels in our great lake...Have we not learned anything? Im waiting on buying a boat until someone actually does something to help our resources..This will not only be an environmental, but economical disaster if the asian carp enter lake erie.
