The Corps was mandated to study ways to “prevent” invasive species movement between the Great Lakes and Mississippi River. Deplorably, the Corps has decided to spend precious time and resources to also study ways to “reduce the risk,” not just prevent. This was not authorized by Congress nor is it a credible strategy that will protect our Great Lakes. This is unacceptable and only options that will “prevent” invasive species movement and stop the Asian carp should be studied.

No need to study for the next 5 years. SEPERATE THE WATERSHEDS NOW!!
