The Michigan Section of the American Water Works Association (MI-AWWA) strives to unite the full spectrum of the water community to protect public health and to provide safe, secure and sufficient water. Through collective leadership, MI-AWWA advances technology, education, science, management and government policies. MI-AWWA urges the USACE to ensure the scope of the proposed GLMRIS provides consideration to the impacts to public water supplies (PWS) from aquatic nuisance species (ANS). Existing ANS such as the zebra mussel and quagga mussel have already had significant impacts, resulting in significant cost borne by PWS rate payers.
