The stopping of this highly invasive species is of utmost importance. They will devastate our Great Lakes and all the lakes give us. Recreational boating will be safer as these fish will jump and can push people, adults and children alike, out of the boat. Anglers will no longer be able to catch trophy species that our state and our Lake Erie offer. Restaurants won't be able to serve walleye, yellow perch or bass as the Asian Carp will wipe them out. These Asian Carp are bad for our miles of beautiful beaches that allow for many tourists to come to our region. This will destroy our economically deprived area already let alone bring blight and sorrow to our Great Lakes. You must stop them NOW.

Study only solutions that will completely prevent the movement of invasive species between the Great Lakes and Mississippi River, and Ohio River that will destroy thousands of wonder rivers and streams.

2. Provide answers for the Chicago portion of the study within 18 months or SOONER.

Thank you and may these be stopped before it is too late!
