Please take action ASAP to prevent the spread of Asian Carp into the Great Lakes. The Great Lakes are truly America's greatest natural treasure, and provide endless recreation, food, and commercial support to the country.

Please study and implement solutions that will completely eliminate the risk of Asian Carp spreading from the Mississippi watershed into the Great Lakes, since anything less would be a potential disaster for the Great Lakes.

Please take this action soon. The problem has been known for several years, and there is no reasonable excuse for not taking action soon. Failing to act, will almost certainly result in failure to keep the invasive species out of the Great Lakes, and would be an environmental disaster.

Thank you for allowing these comments.
