To Whom It May Concern:

We are very concerned that the Asian Carp will invade the Great Lakes and feel that agencies should only study solutions that will PREVENT the species from entering the Great Lakes via rivers. We would also like to have answers for the Chicago portion of the study within the next 18 months. This is too critical of an issue to have any delay.

The Great Lakes have already been compromised by zebra mussels and other invasive speices. Do not allow this to happen with the asian carp.
