The Army Corps of Engineers Great Lakes and Mississippi River Basin Interbasin Feasibility Study (GLMRIS) must be conducted in a timely manner, within 18 months, in order to implement permanent solutions to stop the invasive Asian Carp from spreading between the Great Lakes and the Mississippi River Basins. They must study ways to prevent rather than "reduce the risk of" this species invasion. Finally, the use of already completed risk assessments (from the U.S. Fish and Wildlife Service, and the Fisheries and Oceans Canada) must be used to facilitate quick and decisive action.
