PLEASE act quickly and decisively to prevent the Bighead and Silver carp from entering the Great Lakes ecosystem! There is absolutely NO time for more studies, action must be taken immediately to keep these invasive and devastating species out of the Great Lakes ecosystem! All studies do is waste money and precious time which there is none of the latter left. If you people really want to do what's right, you will act now and stop wasting time as these Asian Carp are getting closer to breaching the woefully inadequate barriers presently in place. I have lived my entire 62 years on the shore of Lake Ontario and have witnessed first hand the ecological mayhem already caused by the scores of invasive species that have entered through the St. Lawrence Seaway. We don't need yet another disaster that is most assuredly preventable with speedy action to cut the link between the Mississippi River System and the Great Lakes.

Thank you for reading!
