As a tax-paying resident 6 months of the year on the St. Lawrence River I am pleading with, even begging you to learn by the mistakes of the past. Think how many major river's pristine condition has been lost by pollution and by NOT taking timely action. Now we have the last "clean" savable river being threatened by the invasion of a species that will damage BEYOND REPAIR our remaining chance to hold on to what is good, what works. Again you threaten our heritage by "doing a study", by dragging your feet since it looks good to the tax payer to delay anything that smacks of cost. Again you will NOT do what is right, you will NOT step in BEFORE we are left to face the newest horror. Study, meet, make speeches, dissemble until it is too late and we, in this country, will once again have lost a source of: livelihood, overseas and US commerce, clean useable water, and an integral part of the balance of nature. Once again you will be responsible for: "clean up", the horror of irreplaceable loss, and yet another project that will take billions to reverse. How can you do that? How can you justify ignoring the ugly reality that threatens us at this very moment. Stop stonewalling..take action to protect us NOW. I'm your average voter, your average taxpayer, I say ACT NOW!!!
