Congress, the USACE, and the IJC are not giving the Asian carp problem the priority they deserve to be quickly and completely resolved. This amounts to ignoring the wishes of the public and is becoming a stereotype of how our government operates. The USACE's Asian carp study should be completed in 12 months or less. And, we must keep in mind that not only will the solution to the carp problem be realized, large parts of the Chicago metropolitan area will receive new, modern sewer facilities that will save taxpayers money, attract business, and provide clean, healthy water for all Chicago-land residents.

I strongly urge we get on with this as quickly as possible.
