A 5 year "study"? It is never easy to take the lead, make tough decisions and do the right thing, is it? We do not have 5 years - everyone agrees on that. The future of the Great Lakes is at stake here. Billions of commercial and recreational dollars, not to mention an invaluable natural resource upon which our lives depend, hangs in the balance. Dedicate the resources necessary to protect this national treasure, assign responsibility to make it happen and get it done. 20 years and nobody has accomplished much. You are simply out of time.
